THE ONE PLACE THAT CAN TAKE YOU ANYPLACE – INCLUDING THE TOP OF THE GREAT PYRAMID

JULY 11, 2016 ERIK ERNST LEAVE A COMMENT

Wisconsin Public Television is the one place that can take you anyplace – like this brilliant 360-degree immersive view from the top of Khufu's Pyramid, or the Great Pyramid of Giza from our friends at NOVA. Spend some time exploring one of the world's rarest vistas. (Click through on the image if it isn't interactive in this window.)

And don't miss NOVA Wednesday nights at 8 on WPT. Or watch full programs online anytime.

NOVA I PBS
on Thursday

It's a 360° view fit for a pharaoh.

From this 45-story-tall perch atop Khufu's Pyramid, you can see Khafre's Pyramid just to the left of the setting sun. Farther to the left is the Sphinx and Khufu's three Queens' Pyramids. The bustling city of Cairo lies beyond, its 10 million inhabitants living and working in the shadows of some of ancient history's most iconic ruins.

Take in this rare vista—climbing to the top is prohibited, but we managed to get permission to scale the ancient wonder to share it with you.
