## // Projects

### **Block & Mortar - Developer March 2018**

[www.blockandmortar.nyc](http://www.blockandmortar.nyc)

Allows for community sales of goods and services using the Ethereum blockchain. Built using React-Redux, Sequelize, Express, Node, Truffle, Ganache, MetaMask and Tachyons.

### **Plot Lines - Solo Developer Feb. 2018**

<https://github.com/k-vosswinkel/plot-lines>

A force-directed and customizable graph that allows you to plot relationships between characters in books and TV shows. Built using D3 and SVG

### **Grace Shopper - Developer Feb. 2018**

[github.com/shopping-trifecta/graceshopper](https://github.com/shopping-trifecta/graceshopper)

An e-commerce site built as a part of the Grace Hopper curriculum. Built using React-Redux, Sequelize, Express and Node.

### **EAA Ch. 491 - Solo Developer July 2017**

<http://www.eaa491.org/>

A community website for Chapter 491 of the EAA. Built using Wordpress, HTML and CSS

## // Work Experience

### **WNET**

#### **Digital Producer**

New York, NY Sept. 2016 - Jan 2018

Brought New York Public Television's content to new audiences by acting as a project manager for multi-media campaigns leveraging:

- Newsletters reaching +120k subscribers
- Web series reaching +700k viewers
- Infographic campaigns for social media reaching hundreds of thousands of subscribers each month

### **Freelance**

#### **Front End Web Developer**

New York, NY Sept. 2016 - Present

Improved outreach for small businesses and nonprofits by redesigning their websites, which led to higher visibility, increased sales, and a more seamless user experience.

### **Wisconsin Public Television**

#### **Online Editor**

Madison, WI Sept. 2014 - Sept. 2016

Designed, built and maintained pages for the five main websites managed through WPT. Redesigned the station's blog and launched a Wordpress-based intranet.
